

## COURSE OVERVIEW

This unit describes a participant's skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

## COURSE ELEMENTS

- **Planning and preparing for work in confined space** by applying procedures and safety requirements to ensure the activity is compliant, confirming regulatory requirements & the emergency response procedure, implementing signage/barriers, selecting appropriate equipment, applying environmental protection requirements & correctly positioning rescue equipment..
- **Working in a confined space** by gaining access to/entering a confined space, testing and monitoring the atmosphere, correctly tagging & following lock-out procedures, maintaining communication, complying with permit requirements & adhering to allocated entry time.
- **Exiting a confined space** by conducting appropriate inspections, removing tagging & lock-out & accurately completing your entry permit.
- **Cleaning up** by clear, clean, check & maintain your work area, tools & equipment as well as barriers and signs.

## COURSE FRAMEWORK

### FORMAL TRAINING
