

Residential Moving Services

"I've always hated moving house, but professional help made a world of difference"

Keys Bros offers a thoughtful, professional service that makes the chore of moving house a whole lot easier.

You can rely on our years of experience to efficiently manage the shift to your new home whether it is in the next street, across Australia, or overseas.

Moving Solutions

From the initial meeting, our friendly consultants work closely with you to carefully plan every aspect. They will help you choose the best options in freight, packing, storage and other important aspects such as cleaning and valet services.

Our uniformed staff will pack your house, room by room, identifying the contents of each carton in a descriptive inventory and condition report that makes unpacking a breeze.

Keys Bros offers a complete solution, with special crates and materials on hand to protect your precious goods and valuables in transit. But our service doesn't end there!

Local and Country

Attention to detail is the key to a successful move. Keys Bros has developed door-to-door solutions for vehicle and pet transport and insurance coverage.

Your new home will also feel comfortable from the very start as our team of valet assistants cleans and unpacks your belongings. If there is a need to dismantle and reassemble wardrobes, wall units and other carpentry, we will supply a tradesman to do the job at your request.

Interstate Moves

Keys Bros can manage your move to all Australian states. As members of the Australian Movers Group, an affiliation of family-owned and operated removalists, your possessions will be in our care every step of the way.

Keys Bros has developed a unique relationship with the Australian rail systems to compliment the national AMG network. These resources ensure we are able to access the quickest, safest and most efficient combination of road and rail transport around the country.

International Moves

A door-to-door overseas service is managed through our worldwide network of agents who provide air freight, sea freight or a combination of both.

Keys Bros is recognised by major Corporations and Government agencies who regularly entrust us to relocate their staff offshore.

To ensure your safe arrival, Keys Bros handles packing and crating, export wrapping, a full container service, shipping documentation, custom clearance and transit insurance.

Customer satisfaction is our purpose. This is the commitment we stand by and the driving force behind our rapid business growth.
