Structural & Fencing Products**

Roofing & Walling

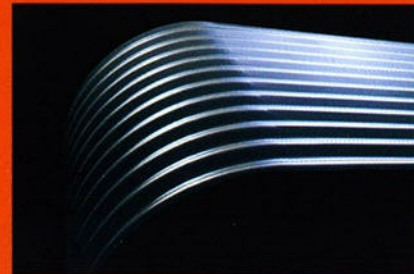

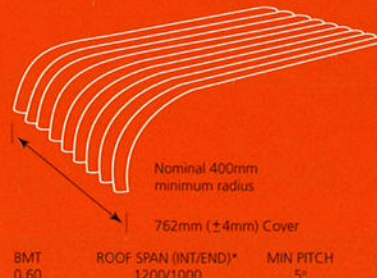

Stramit® Corrugated

Stramit® Corrugated sheeting is a traditional profile available in a range of colours. With wide cover for quick installation and easy handling, plus a minimum 5° pitch, Stramit® Corrugated sheeting suits traditional and contemporary roof designs.

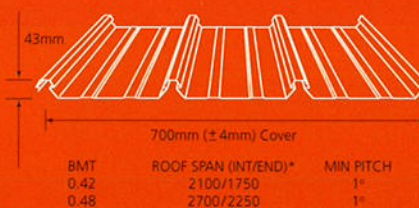

Bullnosing & Curving

Bullnosing and Curving expands the versatility of Stramit® Corrugated roofing. Bullnosed and curved sheeting is aesthetically pleasing, comes in a variety of shapes and is easily fixed.

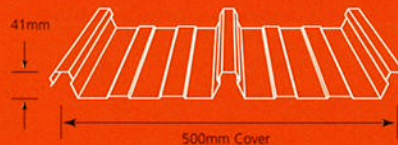

Stramit Speed Deck Ultra®

Stramit Speed Deck Ultra® decking is a revolutionary concealed fixed roof decking system with unrivalled wind load performance. The wide 700mm cover and unique full-length clip rails provide speed of installation and automatic bird-proofing at all fixing points.

Speed Deck 500®

Stramit Speed Deck 500® decking is a wide cover, concealed fix roof deck which provides for a smart appearance together with positive securing under all weather conditions. Quick installations, bold rib design and a minimum pitch of 1 degree ensure Stramit Speed Deck 500® decking remains popular and versatile.

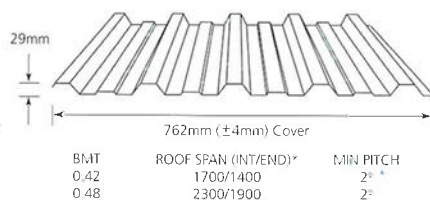

Polycarbonate Sheeting

Maximise the potential of your outdoor living areas with polycarbonate roofing. A polycarbonate roof above your outdoor entertainment area provides protection from the elements whilst still providing natural sunlight. Available in a wide range of colours and profiles to enhance any outdoor area.

Roofing & Walling

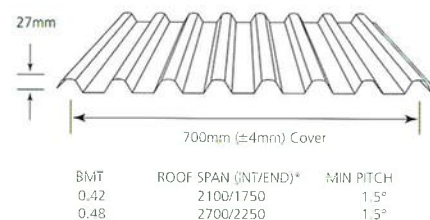

Stramit Monoclad®

Stramit Monoclad® cladding combines economy and practicality with modern design to produce a lightweight, attractive roof and wall profile. The deep ribs provide excellent spanning and high water carrying capacity. The minimum roof pitch of 2° allows for a diverse range of design options.

Stramit® Longspan

Stramit Longspan® cladding is a good looking, long spanning, high-strength conventional pierce-fixed roof and wall sheet. Minimum roof pitch of 1.5° saves on supporting structure and provides design flexibility.

Stramit K-Panel®

Stramit K-Panel® cladding is a low-cost, easy-fix cladding with a broad 864mm cover and low rib height, making it ideal for garage doors, soffit lining, fascia and other cladding applications.

- Not suitable for roofing.
- Maximum recommended length 6.0m.

Stramit Monopanel®

Stramit Monopanel® cladding is an attractive, durable system of interlocking panels incorporating completely concealed fasteners. Stramit Monopanel® cladding looks great in both horizontal and vertical applications.

- Not suitable for roofing.
- Maximum recommended length 6.0m.
- Limited colour range available.

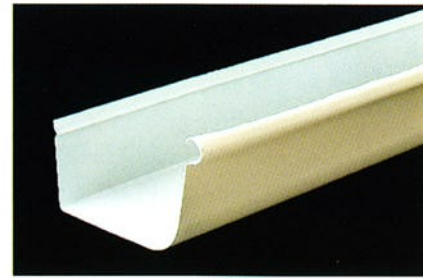

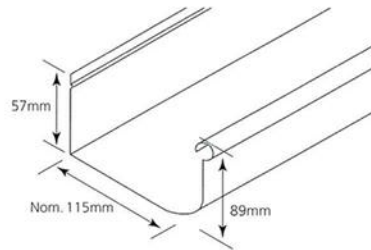

Skylights

A skylight from Central Roofing Supplies will lighten even the darkest room. There is a size and type for every application from opening roof windows to tubular skylights. Make an economically and environmentally sound choice and utilise natural daylight free from the sun.

Rainwater Products

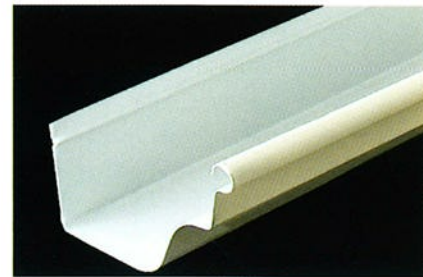

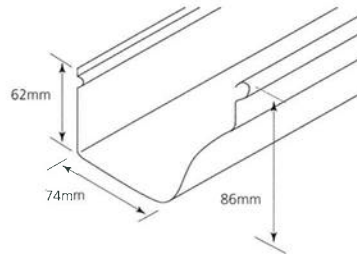

Stramit® Quad Gutter

Traditional gutter design suitable for new installations or replacement of existing gutters. Stramit® Quad 115 Gutter is easy to work with and the hi-tensile steel base provides plenty of impact resistance. Available in a full range of colours and finishes. Also available in the larger 125mm Quad Gutter profile.

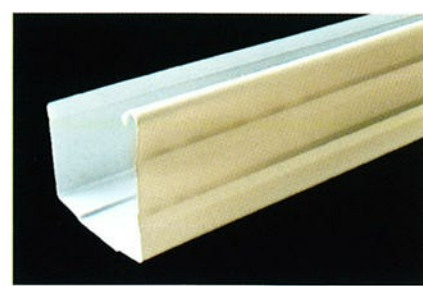

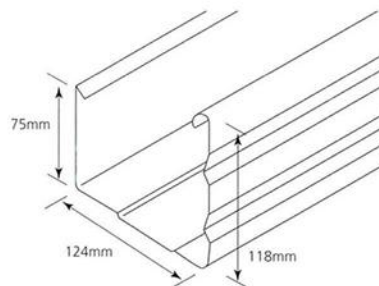

Stramit® O-Gee Gutter

An attractive and practical profile for the Australian colonial roof. Available cut to length, it's an economical way to buy just what you need for the job. A full range of accessories is also available for this popular profile.

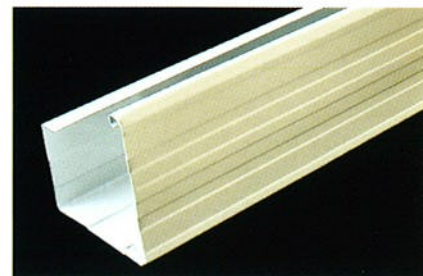

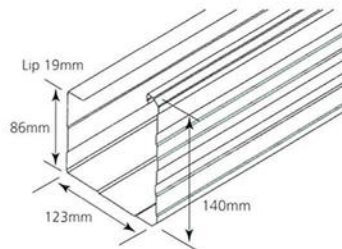

Stramit® Easiflow Gutter

The perfect partner to Stramit® domestic roofing. The square line design has plenty of rain carrying capacity and optional slots along the high face to prevent it from overflowing and flooding the eaves. Manufactured from hi-tensile steel in the COLORBOND® range of colours.

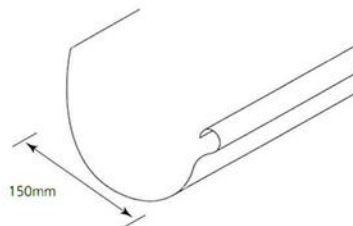

Stramit® Fascia Gutter

This gutter has a large water carrying capacity and a high front (with overflow slots if required) to conceal the edge of the roofline.

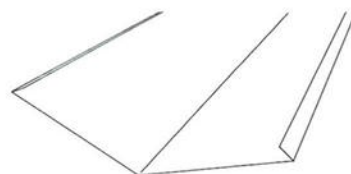

Stramit® Flat Back and Half Round Gutters

The contemporary profiles of the Stramit® Half-Round and Stramit® Flatback Half-Round gutters provide huge water carrying capacity. Available in a wide range of colours with a complete range of accessories.

Valley Flashing

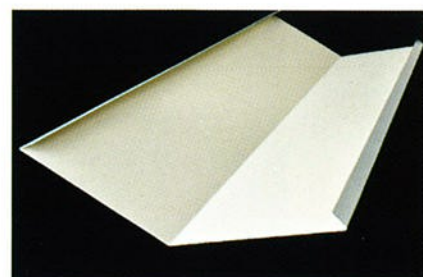

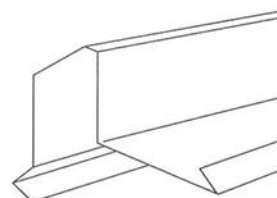

Standard Valley flashing is available cut to length in a wide range of finishes to match your steel or tiled roof.

Barge Gutter

A specialised gutter and edge capping for use on a wide variety of roofing profiles.

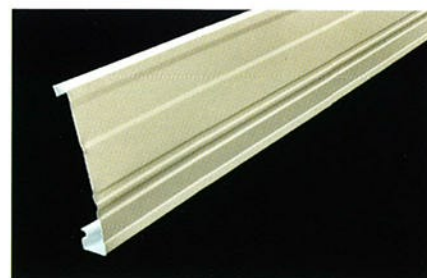

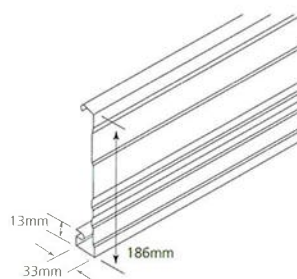

- Cut to maximum length 8.0m.

Fascia and Flashing Systems

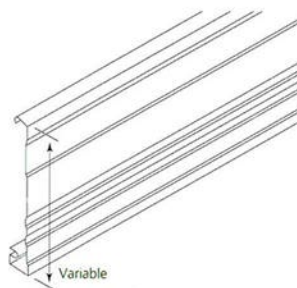

Stramit® Metal Fascia

Hi-tensile Stramit® Fascia is precision engineered, delivered straight and true every time. It never warps, shrinks or splinters. Mix and match metal fascia with Stramit® gutter profiles to create a versatile, great looking guttering system.

Hi-Front Fascia*

Hi-Front metal fascia has been developed exclusively by Central Roofing Supplies for those applications requiring a fascia with a deeper face. Profiled as per standard metal fascia, the system utilises a rafter bracket similar to that of a conventional 185mm fascia. The gutter is fitted using the standard range of brackets.

Raynor Curved Fascia System*

Complete the design of your home with our Raynor Curved Fascia System, custom made to suit any curve or radius and profiled to match most roll formed fascia profiles. Use the design and flexibility offered by this innovative product to complete your vision.

- Some radii may not allow a soffit groove

Fascia Cap

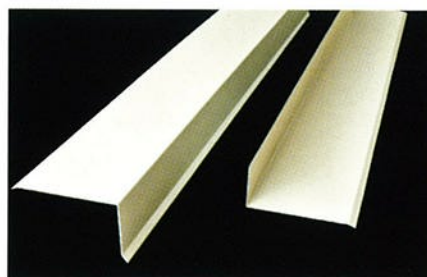

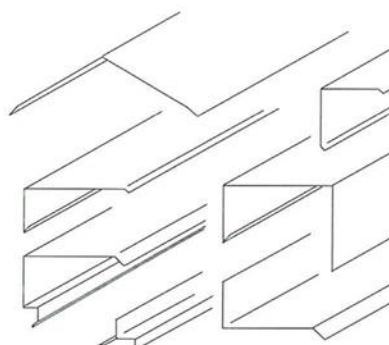

Rejuvenate the appearance of your home with a custom manufactured Fascia Cap.

Available in a full range of COLORBOND® colours, each cap is individually manufactured to conceal the old timber fascia board, adding value to your home while providing years of maintenance free service.

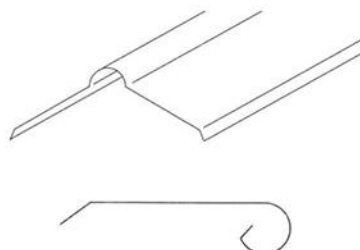

Flashing Range

Central Roofing Supplies manufactures a wide range of flashing including barge caps, corner trims and custom folded profiles to suit your requirements. All available in COLORBOND®, ZINCALUME®, Galvanized, Stainless Steel and Aluminium finishes. Ensure a professional finish to your project with specialised flashing from Central Roofing Supplies.

Stramit® Roll Top Ridge

A very attractive product for the roof ridge, available in the full range of colours.

Rolled Barge

Rolled barge capping enhances the appearance of traditional homes, maintaining the character.

Custom Products

Rainwater Heads

Central Roofing Supplies can manufacture a rainhead to your particular design request. From the most challenging curved faced rainhead to the more simplistic design, our experienced tradesmen can meet most any design criteria.

Tornado Rainhead

The Tornado Rainhead has been designed to move rainwater fast. By the creation of a simple vortex the rainhead removes rainwater five times faster than a conventional rainhead. It is the number one rainhead in Australia using tomorrow's technology today.

Inline Rainhead

Eliminate the damage caused by heavy rains and the buildup of debris in gutters by installing the revolutionary Tornado Inline Rainhead. This remarkable Australian designed and manufactured rainhead can be retro fitted to any house and painted to match.

Awnings, Vents & Louvres

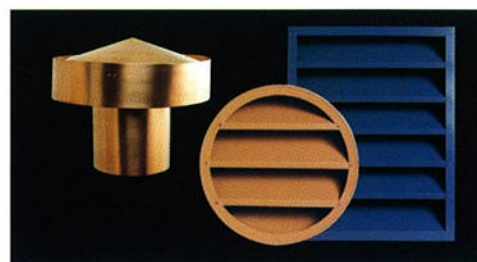

Roof vents, roof penetrations, window awnings, louvred wall vents, vented ridge capping and general sheet metal products can all be manufactured by Central Roofing Supplies to your specific requirements.

Rainwater Accessories

All of the gutter profiles listed in this brochure have a full range of accessories available: from gutter stop ends, internal or external brackets and cast corners, we have it covered. We also have a wide range of downpipes available, both round and rectangular, in PVC or any one of our many finishes COLORBOND®, ZINCALUME®, Copper or Stainless Steel, and a great range of accessories including pops, elbows and astragals.

Custom Sheetmetal Products

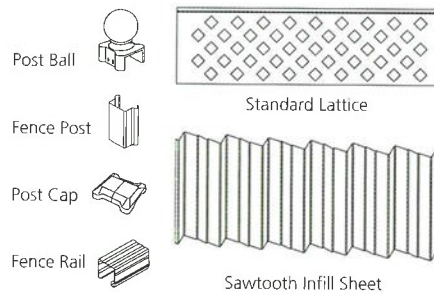

Central Roofing Supplies are an industry leader in the supply and manufacture of custom sheetmetal products. Our modern workshop can produce everything from the most basic request to the more challenging architecturally designed concept. If it's made from steel the experienced team at Central Roofing Supplies are the people to speak to.

Fencing & Leaf Guard Systems

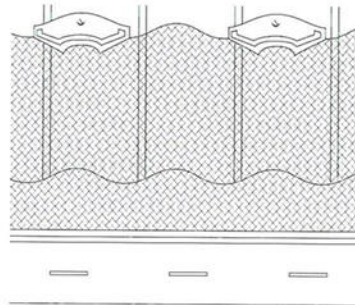

Stramit® Modular Steel Fencing

Stramit® Steel Fencing is made from high quality steel in a wide range of designer colours to suit any home, garden or lifestyle. Stramit® fencing is available in traditional and sawtooth profiles, requires low maintenance and is fire and termite resistant.

Leaf Guard System

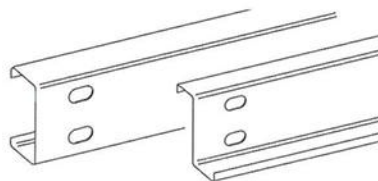

By installing Blue Mountain Mesh, you can be confident that you are using the best gutter mesh for all installations. Available in a wide range of COLORBOND® colours and designed to suit most roof profiles including tiles.

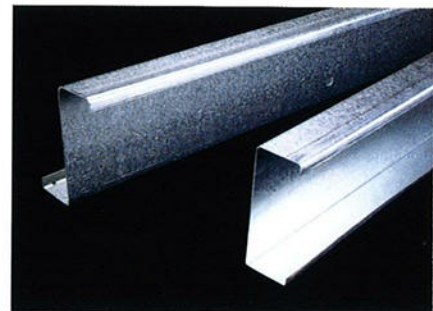

Structural Products

Stramit® C&Z Purlins

Stramit Building Products offers a huge range of purlins, including 100, 150, 200, 250, 300, 350 and 400 series in both C and Z profiles, and Stramit Exacta® C&Z purlins.

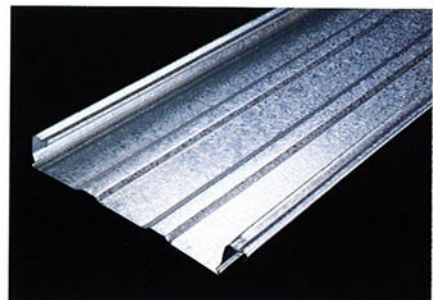

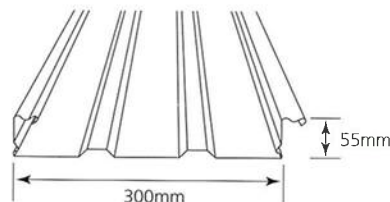

Punched and Unpunched available

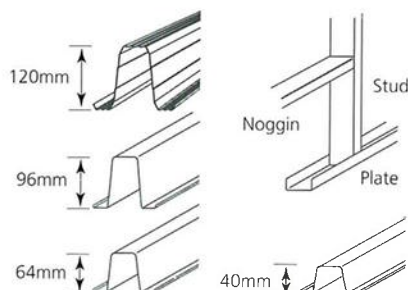

Stramit Condeck HP®

Permanent metal formwork for suspended concrete slabs. Stramit Condeck HP® steel decking is supplied to site cut-to-length for speedy installation. Saves on formwork costs and provides a ready-finished ceiling.

Stramit® Lightweight Structural Sections

Stramit manufactures a range of Top Hats, Roof Battens, Ceiling Battens and Stud Sections for domestic roofing, garages, sheds, partitioning, etc.
