

PRODUCT DESCRIPTION

- ✓ E-Pet is an odour eliminator that has been specifically formulated to treat pet affected areas.
- ✓ E-Pet will neutralise odours and attack odour causing bacteria.
- ✓ When applied properly E-Pet will remove the odour caused by pet visits and re-odourise the area with a pleasant fragrance that will disguise the problem and reduce visits to these areas by pets.

FEATURES AND BENIFITS

- ✓ E-Pet is specifically formulated to eliminate odours and re-odourise the area.
- ✓ E-Pet attacks odour causing bacteria.
- ✓ The pleasant fragrance will disguise the problem and reduce return visits to the area.

WARNING: If a pet has repeatedly urinated in the same area, the urine is likely to have significantly penetrated the underlay and subfloor; areas that E-Pet cannot reach. In these cases more invasive treatment of the underlay and subfloor may be required.

DIRECTIONS

Detect the affected area either by using a hydro sensor or asking the customer where the pet has made the mess.

Apply liberally to the affected area.

The product will need to be tamped in with either a grundi hand held brush or white nappy. Always use gloves. Do not vigorously rub the affected area.

Allow 10 mins dwell time.

Dry off by tamping the area with a white nappy or absorbent paper towel.

Apply a fine mist over the area (use sparingly).

leave to dry and walk away.

NOTE: this process is more affective after the cleaning process has been completed.
