We specialise in following drain cleaning and drain repair services:

- Blocked sewer drains – internal and external
- Blocked storm water drains – downpipes and pits
- Tree root cleaning
- Blocked bathroom drains – showers, basins, baths, floor grates and toilets
- Blocked kitchen drains – sinks and gullies
- Replacing cracked or Broken sewer and storm water drains
- Drain excavations
- Drain renewals

We use the latest technology to clear blocked drains:

–High Pressure Water Jetters are used to clear **blocked sewer** and **storm water drains** up to 225 mm in diameter. The main reason our company uses this new technology over conventional Electrical Eel is this **drain cleaning equipment** is far more superior (Please see picture below). Electric eel grinds through the **blocked drain** whilst a pressure jetter penetrates the **blockage** and fully cleans internal drain walls, pushes sand and other debris out of the drain. Also there are many attachments being used for different blocked drain applications, such as: Tree root cutting, sand and soil removal from **storm water drains**, grease removal for catering businesses and more.

The picture above shows the difference of using conventional Electric Eel VS High Pressure Jetting as **drain cleaning** equipment.

–Drain Camera is the only equipment used to identify **damaged sewer and storm water pipes**, as storm water and **sewer drains** are located below ground. The drain CCTV cameras take the guessing out of the work. This equipment clearly identifies the causes of re occurring **blocked drain problems** where the footage or picture is presented to our valued clients and making it easier for them to make informed decisions on **drain repairs**.

–Underground pipe locators used to pin point camera head location showing us the exact location including the depth of **damaged drain pipe** making it easy for us to provide accurate quotation for repairs.

24 Hour Blocked Drains Assistance Melbourne

Blocked drains are a regular occurrence in Melbourne's households and businesses, there are many things which can lead to a **blocked drain**.
